![sociaal intranet logo]

Seneca's Social Intranet is user centered. You start your day on the custom-designed dashboard. You will immediately see the new social and corporate messages, your agenda and the links to important applications for you. Subscribe to groups that are relevant to you and stay informed with the latest news.

Involved employees

The success of a Social Intranet is determined by its users. That is why it is important to involve end users of the intranet at an early stage and to keep them involved.
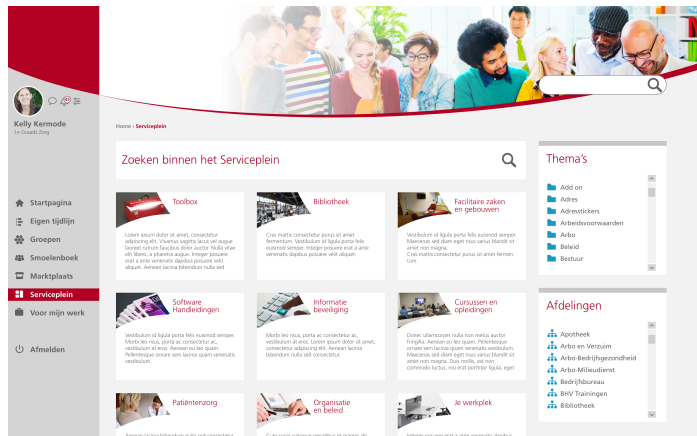

Actively involve end users in the development, deployment and successes of the Social Intranet. This makes it an interactive platform for and by users.

Seneca's Social Intranet is modular and consists of standard software. We will set up what you need within a few weeks. Together with you we ensure a perfect connection of the Social Intranet with your organization.

Social Intranet = digital workplace

- For any device at any location
- (Multimedia) contributions in groups
- Notifications for new contributions
- Products and services catalog
- Find data from multiple sources
- Integration with processes (forms)
- Integration with your (business) applications (such as AD and Office 365)

And much more...!
